

CHG0030106 — [TITAN] High — legacy_eol on sap-ecc-prod-ehp5

Severity	High	Priority	2 - High
Cloud	Multi	State	Assigned
Resource	sap-ecc-prod-ehp5	Group	security_engineering
Resource type	SAP::ECC::ApplicationServer	Change type	Normal
Opened	2026-04-22 19:43:27	Closed	2026-04-22 19:43:27
CAB required	Yes	Close code	—

Security Finding

SAP ECC 6.0 EHP5 non-HANA detected – mainstream maintenance ends 2027-12-31 (995 days). Runs manufacturing ERP with SOX-relevant financial postings. Migration to S/4HANA deferred. Fails SOX ITGC-CM, ISO 27001 A.12.2, NIST 800-53 CM-6 (planning failure).

Justification

High: SAP ECC 6.0 EHP5 non-HANA detected – mainstream maintenance ends 2027-12-31 (995 days). Runs manufacturing ERP with SOX-relevant financial postings. Migration to S/4HANA deferred. Fails SOX ITGC-CM, ISO 27001 A.12.2, NIST 800-53 CM-6 (planning failure).

Implementation Plan

1. Pre-change snapshot captured by TITAN (auto-rollback available).
2. Execute fix command:
Begin S/4HANA migration assessment (SAP Readiness Check 2.0). Enroll in SAP Premium Extended Maintenance (\$TBD) until cutover. Compensating: segregate from DMZ, SIEM forwarding of SM20 audit log.
3. TITAN FORGE verifies the fix was applied.
4. Post-change rescan by TITAN SCOUT – finding must no longer appear.
5. Close ticket with Successful close_code.

Risk & Impact Analysis

Risk level: MEDIUM-HIGH risk – misconfiguration with realistic exploit path.
Business impact if unremediated: Increases attack surface; auditor finding likely.
Scope: single resource (sap-ecc-prod-ehp5).
Blast radius: change is idempotent; pre-change snapshot captured by TITAN; auto-rollback available if rescan fails.
Finding detail: SAP ECC 6.0 EHP5 non-HANA detected – mainstream maintenance ends 2027-12-31 (995 days). Runs manufacturing ERP with SOX-relevant financial postings. Migration to S/4HANA deferred. Fails SOX ITGC-CM, I

Backout / Rollback Plan

1. TITAN auto-captured snapshot of sap-ecc-prod-ehp5 before change (baseline: titan-legacy-demo-20260422T201927Z).
2. If post-change rescan still shows the finding OR a new issue appears within 15 min:
 - a. TITAN FORGE fires rollback automatically using stored snapshot.
 - b. Incident reopens and escalates to on-call.
3. Manual rollback command path (human override) is documented in close notes.

Test Plan

1. TITAN SCOUT rescans sap-ecc-prod-ehp5 immediately after FORGE applies the change.
2. PASS criteria: the specific finding no longer appears in SCOUT results.
3. PASS criteria: no new CRITICAL or HIGH findings introduced by the change.
4. Automated compliance check: HIPAA/PCI/SOC2 controls re-evaluated.
5. If any check fails, backout plan fires automatically.

Recommended Fix Command

Begin S/4HANA migration assessment (SAP Readiness Check 2.0). Enroll in SAP Premium Extended Maintenance (\$TBD) until cutover. Compensating: segregate from DMZ, SIEM forwarding of SM20 audit log.

Compliance Mapping

CIS Benchmark, SOC 2 CC6.1

AI Close Notes

TITAN CONDUIT opened this high legacy_eol change request and assigned it to the security_engineering group for review. STATE: ASSIGNED – awaiting human action. Per TITAN AI policy (and Kazmi rule, 2026-04-22), configuration changes are NEVER auto-applied and change tickets are NEVER auto-closed by TITAN. The assigned group reviews the recommended fix, schedules a CAB-approved change window, applies the fix manually, validates via SCOUT rescan, and closes this ticket themselves. TITAN documents and routes – the human owns the change from here.
